PROCEEDINGS
 1
 2
                 (Recording of the meeting began at 9:32
    a.m.)
 3
                 MR. HOPE: Okay, folks. Good morning.
 4
    Ladies, gents, good morning. Let's begin. Okay. It's
 5
 6
    now 9:32. Good morning. Welcome to the Finance
 7
    Committee meeting.
                 It appears it's going to be a short
 8
 9
    committee because they still don't trust me with any
10
    resolutions, so they're weaning me in. All right. So,
11
     if we could first have the welcome and open remarks.
12
                 Is there anyone from the public?
13
                 MS. JEANTY:
                              No.
14
                 MR. HOPE: Okay, no public comments.
    Approval of the Finance Committee meeting. You could
15
16
     take a look and then have a motion, please.
17
                 MS. FERRADAZ: I move.
18
                 MR. HINCAPIE: Second.
19
                 MR. HOPE: Okay. All in favor?
20
                 (WHEREUPON, the Board members all responded
21
    with "aye".)
22
                 MR. HOPE: All opposed?
23
                 (NO VERBAL RESPONSE.)
24
                 MR. HOPE: Okay. So, next we're going to
25
    take a look at the investment strategies. In looking at
```

2.

the by-laws, the by-laws state that the Finance
Committee should review the investment policy
periodically and on an annual basis.

However, when you look at the investment policy, it states that the Finance Committee should review the investment policy at least on a quarterly basis.

The second section in the investment policy, which we will take a look at, also states that on a monthly basis at each Finance Committee meeting, the CFO should present to the Finance Committee status on all investment transactions.

So, today, we will discuss whether or not we want to review and maybe make some amendments to the investment policy to keep or exclude the section that requires a presentation on a monthly basis.

So, I'll turn it over to Bill, who is also going to provide an overview as to where we're at as it relates to the investments, given the fact that we have a significant amount of funds that are currently held at various institutions.

So, Mr. CFO, all over to you, sir.

MR. KIRTLAND: You said it was going to be a short committee meeting but you did not allow me to begin this presentation and utterly confuse everybody

into a longer question-ridden meeting.

So, good morning, everybody. This morning, I'm joined by Wendy Duncombe and Chareka Hawes, also at the finance department, who are sufficiently knowledgeable in a lot of the things that we do on a day-to-day basis and investing our funds amongst our financial institutions.

So, this is a strategic move on my part, so if the questions get difficult, then I just start, you know, deflecting over to my team of expertise. But essentially, we're excited about this opportunity this morning to go over our investments and our policy.

As Mr. Hope and I have discussed previously, this is something that maybe we actually haven't had the opportunity to do in the past -- or I shouldn't say "opportunity" -- but we have not presented on it in sometime, and we thought this was a good moment to bring it back to the surface and discuss it, especially at this point in time of the year when we've collected a sufficient amount of funds from our tax roll where they're holding a large amount of cash until expenses are realized throughout the year in our programs and as we go through and realize our fiscal year as we go through the summertime where a lot of our expenses are realized.

2.

So, what we provided to you on the tabs, on your I-Pads, as you might be able to see, one of the top tabs are labeled "Investment" -- our investment portfolio. You'll be able to see the word "investment."

So, the first one sheet -- the one-sheeter that we provided to you, is going to provide both sort of a graphics as to how we're holding our amounts. I'm just going to reference back and forth really quickly.

And if you swipe to the right, as Mr. Hope was alluding to, we've included excerpts from both our Trust investment policy and the by-laws, so that we can discuss what our reporting requirements are on a quarterly or monthly basis and what information the Finance & Operations Committee will be requiring on a regular, periodic basis.

But going back to our one-sheeter, I just wanted to walk everybody through what information that we've included. And hopefully, visually, you can see a lot of the data points that have been included, because we wanted to try to summarize a lot of information into one graphic here.

But essentially, we are primarily holding our funds at two financial institutions, TD Bank and City National. We have a longstanding history with City National Bank and we more recently have opened up

2.

accounts with TD Bank as of, I think, two or three years ago. We opened up accounts to primarily handle our operating activities out of TD Bank, especially as we were searching for a financial institution that provided us with the types of internal control requirements that we have, especially as we started to explore making payments to our providers via ACH in addition to some limited check payments that we're making to vendors.

So, you can notice in the graphics that a large piece of the pie graph in blue is 105 million dollars that we are holding with TD Bank. And it's allocated to 30, 60 and 90 day CD's.

And we've essentially layered our funds in those different maturing certificates of deposits so that we can time our liquidity so that there's enough funds available to our programs as the year progresses.

And any funds that we can roll over into more additional 30, 60 or 90 day CD's, we will do so. We can go to questions.

MR. TROWBRIDGE: I have a question. Is there any issue with the FDIC limits in relation to the large balance?

MR. KIRTLAND: Well, not necessarily, because we essentially, as a part of what Florida

Statute requires and what's built into our investment

policy is that we're required to bank with QPD's, which 1 2. is qualified public depositories. So, I think there's a requirement to have a 3 QPD certification that those FDIC limits are fully 4 5 covering all of our account holdings and that we have fully collateralized accounts which is the requirement, 6 I believe, of the QPD. 7 MR. TROWBRIDGE: So that does limit the 8 banks that we can work with ultimately? 9 10 MR. KIRTLAND: Sorry? MR. TROWBRIDGE: 11 That limits the banks we 12 can work with, because not all of them have those --13 It does, right. So, that may MR. KIRTLAND: 14 be, when we've had the discussion previously about 15 whether or not we could bank with smaller community 16 banks versus larger banks, this might be a limiting 17 factor in who we typically bank with. 18 Not to say that, you know, a smaller community bank doesn't have the qualified public 19 depository certification, but it does provide some 20 21 limitation there. 22 MR. TROWBRIDGE: Okay. Thank you. MR. HINCAPIE: Would there be an advantage 23 24 to banking with a community bank, with a smaller 25 community bank, if, you know, the deposits weren't so

high?

MR. KIRTLAND: If they could offer, I guess, the competitive rate amongst, you know, the CD's and money market accounts and operating accounts that we typically bank within, there could be, you know, advantages. I don't know if in the past, there's been advantages at the community banks when we opened it up.

MS. DUNCOMBE: Well, primarily the interest rates and, I believe, with the Florida Statutes, when there are required QPD's, sometimes we have limits as far as the collateral that they put in so there's a limit to the amount that government entities can invest. So, that may be something that would come up, that they probably wouldn't have as much funds or collateral as like a TD Bank would.

MR. ALI: When we were making the decision about TD Bank, you had asked that question, and that was the kind of feedback we got from the smaller banks.

MR. KIRTLAND: So, continuing going through the --

MR. HOFFMAN: I raised this issue with you last week, this similar issue. First of all, I think that we need to understand policy. In principal, at least, my vent would be to invest more funds with those community banks that can do it, even if they're large

community banks.

You know, TD has a big presence in our community, but they're not -- they're not --

MR. TROWBRIDGE: Toronto Dominion.

MR. HOFFMAN: We have, even some of the larger groups, like, Bank United or Florida Community Bank are really big presences in our community. And I think that one of the things, when we finish figuring out where we are, and Bill will talk about what we should do going forward.

Because I think Bill is right. There is going to be a difference in rates. But I think that even for money markets and just cash deposits, we can get good rates from some of the local banks, including particularly the larger ones that have the capacity.

MR. HINCAPIE: Could we come up with a model where the rates compensate by having community banks work specifically with the areas most in need and just do social impact investment or something of that nature where we can --

MR. HOFFMAN: I think we can -- I don't know the program very well, but I think we still have to stick within this qualified public depository issue which, again, is whether they can -- we can give them our deposits and what they do when they take them. And

2.

it makes them collateralize more than they would for other deposits, so it kind of lowers the rate and it has nothing to do with where we invest the profits.

MR. HOPE: Question. When we did the RFP, when we were selecting banks, at the time that we selected TD, did we have any local banks that qualified under the QPD, community banks that would have met those requirements at that time?

MR. KIRTLAND: I think -- well, just to clarify, back when we made the switch -- when we added TD Bank as one of our financial institutions that we bank with, we did not have an official RFP opened in that process because of the high need to make a quick transition of a lot of our funds over from City National to TD Bank when we were seeking to work with a bank that could handle, you know, the internal control requirements that we had.

So, essentially, we had an informal process of reviewing which banks would meet the needs of the Children's Trust at the time. I think there may have been some community banks during that process that we reviewed during that time. But still, ultimately, TD Bank offered us the best comparable rates and again, the controls that we required.

MR. HOFFMAN: And I don't know that the --

2.

if we go back to the procurement policy, would actually cover this. But even the by-laws suggest that the staff can select the bank and we're just approving the selection of banks.

So, maybe we ought to talk to the attorneys just to make sure to go forward with the non-RFP but getting, you know, quotes and the like, that that's the right way to do that.

MR. KIRTLAND: Right.

MR. HOPE: So, I guess I'm hearing from most of the committee members is that there is a need for us to take a look at other banks, particularly local community banks if they meet the qualifications.

The second question would be, is there anything that would prohibit in terms of how much we can invest or would the committee need to determine "X" percentage of our reserve will be allocated to a community bank? Is there anything that prohibits us from doing so or would that appropriate in this committee?

MR. KIRTLAND: Not unless it's been documented in our current investment policy. And after my review, I don't see any such minimum thresholds that are stated in our policy that we can't put more or less or a certain amount into smaller community banks.

2.

MR. HOFFMAN: And I would just say, I don't know that we want the staff to have to use 10 banks to spread money around because that's administrative right now. But if were focused on, again, whether they're large or small banks, use community banks in the middle for a lot of this cash that we don't need per year. And we an, you know, to the extent that they're able to do it through longer deposits for some of it and then selectively choose --

MR. KIRTLAND: What we have done -- what we have done in our current model, as you can tell by our pie chart, is we do still have small footholds in City National Bank and SBA. We used to have larger amounts open in our SBA account, I think, back in 2007-2008, where we were primarily holding our funds.

And then after our market fallout in 2007-2008, there was a liquidity issue with, I think, a lot of the government or members of that investment pool actually drawing funds out of the SBA account.

So, since that time, I think that they have been working to establish stronger internal controls and providing more insurance to their account-holders or to people to re-enter, you know, their pool of funds to open up accounts that they have better, you know, safeguards in place to make sure something like that has

never happened again.

But being that when our interpretation of what statute has laid out and what our investment policy is laid out, is that safety is the first and foremost requirement and consideration of how we invest our funds, followed by liquidity and our investment income.

So, whereas we are striving to have the maximum possible return, that's after considering that, you know, our funds are first safe and liquid.

So, we have kept operational accounts open with SBA, as you can see, at \$220,000.00, and another account at just over a million dollars. Just in case we maybe ever needed to transition our operations to another account if we had an issue with TD, we could maybe quickly move funds over into another institution so we can continue our operations seamlessly.

But also, in case the SBA option ever seems to seem more appealing to this committee because the rates are competitive compared to where we hold primarily our funds in CD's, we could more easily make that transition back into SBA within a currently existing account.

But essentially, we are -- what's laid out in the statute is that there is a requirement that risk diversification is considered, so we are holding our

2.

immaterial funds compared to TB Bank, but we do have another financial institution, City National Bank, in two types of accounts, both a money market account and an operating account open with City National and our SBA account, in addition to an operating account with TD Bank and our CD's that are open with TD Bank.

So what we've laid out below that is the rates that we're receiving in each of those open accounts with TD and City National and the SBA account, as well as the amount of interest earnings that we've earned year-to-date, which is substantial compared to previous years because of, A) that the rates have been increasing the past couple of years that the rates have been brought to us by TD and City National Bank, as well as we've discussed in previous meetings, that our operating reserves have been building up but yet we have derived a plan to draw that down over the next three or four years.

But since our reserves have been building up, there's been more, you know, more of a base to draw our interest income off of. So, as we draw down our fund balance over the course of the next few years, we can expect that our interest income might not be as substantial as it's been during this time of healthy reserves. So, I just wanted to point a little bit of

attention to that.

I haven't quite gone into, I guess, the makeup of our policy, but I know that there are some questions waiting.

MR. HINCAPIE: I just wanted to make a quick comment. Remind, you know, us and the committee and staff that the best and highest return investments that we can get are healthy children both mentally and spiritually.

And I know it's important, but as we move forward, I would love to see that we work with banks -- and this is a trend. People are looking at getting not only good returns on their investment but making an impact on their communities.

And I would hope that we do this in terms of the people we work with, the people we associate with, and especially the people we bank with.

So, I just wanted to -- and again, you know, we don't need to -- we don't want to give you more work. But I wanted to make sure that what we're doing is meaningful in every aspect.

MR. ALI: I know the banks that Ken mentioned, whether they're active community banks, because, again, when we looked to decide which bank, again, Nelson was the one who got us the use of local

2.

banks. And after Tiffany had researched it, even though they're labeled as "local," all of their home companies were in a lot of countries, still controlled by an outside. So we just want to put that out there so that even though they're within our community, it's still an outside agency that's running those banks. So, we'll have to investigate if we decide to go down that path whether, in fact, if that's the community per se.

MR. HOFFMAN: I think, and again, not in defense of the banks in particular, for example, who recently starting banking with Florida Community Bank, they are owned by Georgia Bank now since last December.

If you look at their network and the network of those who are Bank United, it's the same figure, and they have out-of-town owners but by and large, they're not just in our community but South Florida, Florida.

But I also think, and again, this is -Bill, a lot of this, I know, is in your court. But, for
example, we do have a lot of excess -- this is a
distorted picture, because this is December 31.

This is when all of our receipts have been coming in and it's going to start drawing down during the year. But even on that basis, if we're keeping 30 million dollars in a money market account, it's going to be about 1.5 points less, that's \$400,000.00 that could

2.

be invested in other things on an annual basis that could be used for services.

I guess we need to look at those two things. And also, again, find something that's good for our community, which I'm not saying TD Bank is not. But I don't know, like, for example, Bank of America, which is well known for putting a lot of money into the community, if they qualify, we'd rather see the money go there.

MR. HOPE: Question. So, we have about 18 percent of our reserve in City National, but their interest rate is significantly lower. What is the case that you would make for us keeping 29 million dollars as of December in City National?

MS. DUNCOMBE: I'm sorry. I just wanted to speak to the point that Ken made, because the 29 million appears to be higher at December 31st, we did, at that time, get a large amount of money that came in from tax deposits, so it was higher than we normally would.

MR. KIRTLAND: Right. And that needs a point of clarification. The current cash flow model of how we receive funds is that City National is the first to receive the tax roll.

So, essentially, we move the funds periodically from the operating account at City National

2.

over to TD Bank. So, based on certain timing considerations, our operating account in the City National account can increase in funds.

But still, to speak to your question, right, the balance that we hold keeping and operating our money market account open in City National can be discussed here.

Essentially, the preliminary or the design that we took as staff in keeping a balance open was that we knew that we, in our fund balance draw-down plan, that we were seeking to bring our fund balance to roughly in the range of 25 to -- or about 22 to 26 million dollars.

So, we were keeping an account open maybe that could reflect the direction of our fund balance that we could keep a balance open with City National that essentially reflected what we wanted to draw down our reserves to.

But I agree to your point that we could still find ways to allocate a fund balance reserve into an account that is probably a higher interest-bearing yield, if that's the direction that we want to go in with City National or TD Bank.

But, in essence, we are keeping, you know, a certain amount of diversification as we consider, as,

2.

you know, disclosed in the statute, we're keeping a certain balance open with City National, and that was our strategy, and keeping roughly a 30 million dollar balance here with City National Bank.

MR. HOPE: But other than City National being a conduit for receiving the tax funding, is there any other case that can be made, given the fact that their interest rate seems to be much lower?

So, what would be the case, because account can always -- the account that receives the tax dollars can always be changed. It's not something that's difficult to do.

So, is there a stronger case other than that which would say that City is giving us the best return on our money, or what else -- what other proposition do they bring to the table?

MR. KIRTLAND: Other than what was just mentioned to maintain a certain diversification to our portfolio, their rates are not as competitive as what we receive at TD Bank.

MS. DUNCOMBE: Right. That's what I was going to say. I know when we explored moving over to TD Bank, we were going to transition just about everything over to TD Bank. But it was decided at that time by the Finance Committee to maintain City National so that we

could continue to add that diversification, so it was 1 2. primarily for that reason. MR. REYES: I have a question. So, with 3 regard to -- the City National funds seem to have the 4 certificates of deposit, right? 5 MR. KIRTLAND: Correct. 6 7 MR. REYES: Right. So, that affects the rate as well, to some extent, doesn't it? When you 8 9 commit to a longer term in TD, because it seems like TD 10 Bank, those are certificates of deposit, right? So 11 we're going to get a longer interest rate, particularly 12 the ones that, I guess, the ones for 90 days, the CD's? 13 MR. KIRTLAND: Right. I think that the CD rates -- because this is City National rates --14 15 MS. DUNCOMBE: No, this is TD Bank. MR. KIRTLAND: But it was the City National 16 17 rates that were competitive in the money market --18 MS. DUNCOMBE: No, the City National, when 19 they did come and speak with us before, it was a little 20 bit older, we did have certificates of deposit held with 21 them and they proposed the money markets because at that 22 time, they were offering a better rate with the money 23 market since interest rates had gone up. And they have not presented it to be as 24 25 competitive. Even at that time, TD Bank was offering

2.

less competitive rates. That's part of our strategy why we kept on moving funds over to TD as much as possible while it was still secure but to earn as much interest as we could.

MR. REYES: Okay. So that's maybe something that we can consider, because usually -- and it fluctuates depending on the market, but usually what happens is, money markets always carry a little bit lower amounts because (indiscernible) when you have those set certificate of deposits.

But that happens often in markets where depending on what the interest rates are and the policies of the bank generally, sometimes the CD's, the short-term CD's anyway, are not restricted to the money markets. So, maybe explore the certificates of deposits as an option if you want to maintain diversity.

MR. KIRTLAND: Right. And I think our strategy about a year ago was that our diversification of our balances in TD and City National, I think, as the year progressed, were actually much more evenly allocated that this, and we recently decided, because the rates were much more competitive with TD Bank CD's at 30-60-90, we substantially moved over a lot more funds to be held at TD for a longer course of our fiscal year than we had in previous — in our previous years

2.

with City National and TD Bank working together to hold our funds.

But we are now in a model where we've shifted more funds over to TD Bank. And we could, as you suggested, Mr. Hope, maybe even explore where the initial tax roll amounts are received, they could be moved over to TD Bank versus City National Bank.

But since City National has been our more longstanding relationship, that's the institution that we've always received the tax roll from, so we just haven't made that switch over to TD Bank.

MR. HOPE: Just one other question. So, most of our CD's are in three months and six months. Given that we have such a large operating reserve and don't need that money within 12 months, is there a reason why we would not maybe explore at least a 12-month CD and be able to leverage a high interest rate?

MR. KIRTLAND: The offerings that we had received from TD Bank at the time of seeing the 30-60-90 and anything beyond that at 120 and, I think, even at the time, a full year, like, a 365-day note, were not much more competitive.

Actually, as I look at them here, our 120-day notes or 90-day note, actually, was a higher

interest rate than a 120-day note and a 365-day note.

Now, even though those rates are comparable, there's a risk to be considered. Perhaps, if the interest rates were to go down in the long-term, then we could have locked into the same rate as what we were receiving for a 90-day, you know, for a full year.

But as we've been experiencing the past couple of years is a steady growth in our interest rates. So, we thought, if we had the opportunity to possibly realize higher interest rates after 30, 60 or 90 days, that we'd like to realize those higher rates for the CD's that we could invest our funds into after the 30-60-90's mature.

But again, if we're offered better rates at a long-term, we'd certainly explore investing as essential, you know, amount of funds possibly in a reserve balance that we plan on maintaining during our operations into a long-term CD.

MR. HOFFMAN: What else might be a justification, then, putting more money into something like the SBA, which is an investment pool, they invest in cash?

MR. KIRTLAND: Right.

MR. HOFFMAN: So, they may not perform as well but they have at least an opportunity to perform

2.

better than just the cash increments. And, you know, I don't think we're talking about speculating in either case. But I think that at least, I read about that, it's a large investment pool. Obviously, they're not giving it any due by having \$220,000.00.

I would be more concerned when you said earlier that if we have a problem with a CD if we have a problem with TD Bank. If we have a problem with TD Bank with our money or getting our money, it's a bigger problem, I think, than dealing with a state agency right now.

MR. HOPE: I think there was an article that after the economic decline, a number of counties pulled their money out from the SBA because of some investment decisions they made.

So, I think a lot of counties are still shell-shocked. And as Bill talked about maybe some of the internal controls, I don't know where they're at, at this point in time or if the confidence is back to where it should be, that counties are now putting their money there.

I don't know what Miami-Dade County is doing. We might be able to use them as maybe some guidance as to, you know, how they view the SBA's. But I know that after the economic decline, that confidence

level dropped tremendously.

MR. KIRTLAND: And I think maybe one of the challenging statements against the SBA account is that even though they've provided assurances -- have provided assurances into how they've maybe redesigned or built up that fund for people to reinvest into, is that we have yet to incur another market fallout, anything like what occurred in 2007 or 2008.

So, I don't know if an account like SBA has truly been tested during, you know, those kinds of difficult market conditions. So, it's been a healthier growth period, you know, since that time.

But I think, maybe to Ken's point, is that when we think about the standard the statute lays out of safety, liquidity and investment income, if we have a balance available that we know we're targeting to be a permanent operating reserve, then maybe the liquidity aspect of those considerations is a little bit of a less of a concern and that we can have an opportunity, you know, to both be safe but yield the best possible investment income, so I think that's an interesting proposition that you raised.

MR. HOPE: Okay. So, given what the committee has expressed, would a motion authorizing the CFO to research locally qualified QPD's to determine

```
reallocation of some of the funding be necessary? Is
 1
     there a consensus on that before the motion is made?
 2.
                 (NO VERBAL RESPONSE.)
 3
                 MR. HOPE: All right. So, I think the chair
 4
 5
     can make a motion, right?
 6
                 MR. KIRTLAND:
                                Sorry?
 7
                 MR. HOPE: Yes, okay. All right. So, I'd
     like to make a motion authorizing the CFO to research
 8
     locally qualified QPD's to reallocate funds for
 9
10
     investment opportunities. Does that make sense?
11
                 MS. VICIANA: Will there be a report or a
12
     turnaround date?
13
                 MR. HOPE: Within the next 90 days.
14
                 MR. HOFFMAN: So, I think -- obviously, it's
15
    not urgent, but do you think you can come back by the
    next meeting at least with some basic information?
16
17
    Because I think this is leading towards maybe helping
18
    you or you citing what you found and the banks that you
    would like to select and the committee approving that
19
     selection based on the criteria which you've heard. So,
20
21
    maybe by the next Board meeting, you can come back with
22
    a report?
23
                 MR. KIRTLAND: Okay.
24
                 MS. FERRADAZ: And as part of that research,
    does that also include the banks in the community?
25
```

```
MR. TROWBRIDGE: We'll use Nelson's term,
 1
 2.
     "social impact investment."
                 MR. HINCAPIE: Maybe it's more work for you.
 3
                 MR. HOPE: So, do we want -- do we want to
 4
     add that the bank should also have a CSR footprint in
 5
     the community?
 6
 7
                 MR. HINCAPIE: I would say that's what we
     do, that's our essence, yes.
 8
                 MR. ALI: Do we have a motion and a second?
 9
10
                 MR. HOFFMAN: Just to clarify, Bill, you
11
     wouldn't be doing a formal RFP or --
12
                 MR. KIRTLAND: Right. My question would be,
13
     if we were to liken it to what we've done recently, it's
14
     like obtaining our preliminary real estate report where
15
     we get an idea of the market to see if it's worth
     further pursuit.
16
17
                 MR. HOFFMAN: But if you were to contact
18
     about 10 banks, for example, and you'd say, I'm
     interested in finding out your policies, what our rate
19
20
     would be, you know, deposits and certificates -- current
21
     certificate of deposit rate and community investment.
22
                 MR. TROWBRIDGE: I'm going to send the item
23
     so we can continue discussion.
24
                 MR. HINCAPIE: Overtown and Liberty City.
                 MS. JEANTY: So, is there a motion?
25
```

```
1
                 MR. TROWBRIDGE: Yes, I seconded it so we
 2
    could continue discussion.
 3
                 MR. HOPE: Can you repeat the motion,
    please?
 4
 5
                 (Off the record.)
 6
                 MR. HOPE: He's going to read back the
 7
    motion.
                 (WHEREUPON, there was a read-back by the
 8
 9
     court reporter.)
10
                 MR. HOPE: And if you could add to that,
11
    within the -- by the next meeting, correct?
12
                 MS. JEANTY: Yes, by the next meeting.
13
                 MR. KIRTLAND: To report back.
14
                 MR. HOPE: To report back by the next
15
     Finance Committee meeting.
16
                 MR. ALI: Is there a modified motion?
17
                 MR. TROWBRIDGE: I'll accept it.
18
                 MR. HOPE: So, do we need to modify the
    motion?
19
20
                 MS. VICIANA: As amended. You're voting on
21
     it.
22
                 MR. HOPE: Okay. So, we'll take a vote now.
    All in favor?
23
24
                 (WHEREUPON, the Board members all responded
25
    with "aye".)
```

1 MR. HOPE: All opposed?
2 (NO VERBAL RESPONSE.)

3 MR. HOPE: Okay. Motion passes. All right.
4 The second item is for us to take a look at the

investment policy and the by-laws as it relates to the investments.

So, if you go to the second part of the investment policy, it says, "The Finance & Operations Committee shall review, revise as necessary and approve short-term investment program recommended by the investment officer. This program will be presented at each quarter and will outline appropriate options to be taken with respect to the investment of new money."

So, according to the existing policy, a quarterly report to the committee is required. However, if you to the third bullet point, it says, "The Finance & Operations Committee shall, at each scheduled meeting, review investment transactions."

So, the question is, given that the CFO will be reporting on a quarterly basis, if there is a need to retain the section that addresses monthly review and reporting to the Finance Committee.

And I will open the floor for discussion.

And if the answer is "yes," we will retain it. If "no,"

we can make a move to amend the investment policy.

would be fine.

MR. ALI: But first, Steve, I had a 1 2. discussion with Steve yesterday. When we made a change to the by-laws last year, when the Finance Committee 3 gave their input into the editing of the by-laws, we did 4 remove that provision from having a monthly report 5 because we never did it in the past. And now the second 6 7 bullet there, you see it reflects "annually" -- at least annually. 8 9 I don't know how we could modify or when we 10 delete -- if we do agree to delete Section 3 whether, in 11 fact, we have something compatible to what the by-laws 12 state. 13 MR. HOPE: Okay. Any discussion on this? 14 MR. TROWBRIDGE: What's the difference 15 between the amendment processes or policies versus the by-laws? Can do we do policy at this level, whereas the 16 17 by-laws require the Board to --18 MR. ALI: Yeah, I mean, as the Finance 19 Committee, you could direct the staff to just amend that 20 part. 21 MR. HOFFMAN: That's part of the Finance Committee to do that. 22 23 MR. TROWBRIDGE: At minimum, yeah, okay. 24 MR. HOFFMAN: Steve, I think the second

It says, "At each quarter." I think it

```
probably should say "at least quarterly." And again, in
 1
 2.
    my mind, maybe that means that there is going to come,
    at least once a quarter, when a similar type of charge
 3
    or what we've done and if we made any basic changes to
 4
     the strategy to the banks or types of investments. But
 5
    you're right, it doesn't seem like you need to do it at
 6
 7
    every meeting.
                 MR. HOPE: Okay. So, do you want to make
 8
    the motion?
 9
10
                 MR. HOFFMAN: I can't.
11
                 MR. TROWBRIDGE: I'll move the item to amend
12
     the policy as discussed.
13
                 MR. HINCAPIE: Second.
14
                 MR. HOPE: Okay. So --
15
                 MR. ALI: You have to vote.
                 MR. HOPE: Just for clarification, so we
16
    will be removing Section 3 and amending Section 2 to
17
18
     say, "At least quarterly." All in favor?
19
                 (WHEREUPON, the Board members all responded
20
    with "aye".)
21
                 MR. HOPE: All opposed?
22
                 (NO VERBAL RESPONSE.)
23
                 MR. HOPE: Okay. Now to the agenda.
24
    right. I'll turn it over to Mr. Haj for the CEO report.
25
    Oh, I'm sorry, Imran.
```

2.

MR. ALI: So, just an update on the lease.

Last month, we spoke about exploring the possibility of extending the lease. Myself, Jim, and Vivianne met with the United Way CFO, who controls that part of the portfolio, and they've agreed to extend the lease, you know, on a yearly basis until we come up with a building or whatever we decide to do once we get to the point of purchasing or buying a building, etc.

MR. ALI: Well, I think the current terms, we still have to negotiate whether it will be two percent yearly. From what I have included is that we will ask that they increase it every three years at two percent. I don't think they're going to go for it but that's what we have right now.

MR. TROWBRIDGE: At the current terms?

MR. TROWBRIDGE: Is that per the agreement or CPI?

MR. ALI: No, the CPI right now was higher when we looked at it. So we thought about adding the CPI, but just looking at it, the way it's going, we think that it would not be to our benefit, but that's what we had initially asked for.

So, we didn't amend the lease. And Shanika looked at it, sent back some comments. And we're going to send it back to her by the end of the week. Once she

2.

finalizes it, we'll submit it to the United Way for them to have their attorneys look at it and hopefully, we can something executed in the near future.

MR. HOPE: And this is for what year?

MR. ALI: Well, the present lease expires in

November of 2020, so this amendment will take effect

November 2020. So, on a yearly basis, we renew it. But

we did have a proviso -- a provision in it, if we give

90 days notice, we can leave.

MR. TROWBRIDGE: With no penalty.

MR. HOFFMAN: Do we need approval to do that amendment? Do we need Board approval?

MR. ALI: Well, the committee -- the last Finance Committee, the committee had agreed that we could go ahead to explore that. Once we get it and it's finalized, we have to come back to the committee to approve it.

MR. HOFFMAN: Okay. That was my question.

MR. ALI: Okay. You have in your package there, the CEO report on the twenty five thousand. And just a reminder, the Black History Tour is scheduled for next Friday from 8:00 to 12:00. I know some of you RSVP'd. I know our initial count was six. I think it went down a few numbers this morning. If any of you have not RSVP'd, please do so. You'll probably enjoy

that tour.

And I discussed with Steve just to bring the committee an update on an issue that we're investigating at this point. I'm not calling any agency names at this point.

But we have an agency that we suspect is committing some misappropriation of funds, and we're continuing to do some investigation. It looks more likely than not that they're going to refer it to the IG.

And once the IG starts their investigation,
I will contact them to see where we go regarding our
future payments and the billing. So, we'll report back
next month as to where we're at in that process. But we
just wanted to give an alert that we have an agency that
is not using the funds that they were contracted to use
in the manner we expected them to do.

MR. HOFFMAN: What's the magnitude?

MS. SYLVESTRE: So, we believe that they might be using our monies to pay for other services that they're providing and that there might be some double-billing for us and another entity. And vendors also are concerned about competency to our contractual requirements.

MR. HOFFMAN: And is there a dollar amount?

```
1
                 MS. SYLVESTRE: Dollar amount, I don't know
 2.
    what the dollar amount is.
                 MR. HOFFMAN: What's the contract?
 3
                 MR. KIRTLAND: The contract, I don't think,
 4
     is in excess of $150,000.00.
 5
                 MR. HOFFMAN: Is it a million dollar
 6
 7
     contract?
                 MS. SYLVESTRE: No, no, no, no. It's a
 8
     smaller contract. So, they had 60 kids, so it's close
 9
10
     to about $200,000.00.
                 MR. HOFFMAN: Okay. The whole contract?
11
12
                 MS. SYLVESTRE: The whole contract.
13
                 MR. KIRTLAND: There hasn't been a specific
14
     identification of, like, a certain set of questions and
15
     costs. It's sort of an overall performance of the
16
     contract of the program.
17
                 MR. TROWBRIDGE: Is that the typical process
18
     that when you become aware of that, that you refer them
19
     to the Inspector General?
20
                 MR. ALI: Yes, we've done that in the past.
21
                 MR. HOPE: Is this the first year of their
22
    contract?
23
                 MS. SYLVESTRE: Yes, they're a new provider.
24
                 MR. KIRTLAND: Just one other item is that
25
    we, next month, in addition to the other reports that
```

25

```
we've discussed that we'll bring back in the March
 1
 2.
     meeting, is that we are currently working with our
     auditors who we've, you know, procured the first-year
 3
     audit.
 4
                 So, we wanted to do an especially good job
 5
     in our first year, financial statement audit. So, we're
 6
 7
     drafting our CAFR for them now and having them begin to
     review it so that we can bring back the CAFR -- the
 8
 9
     draft of the CAFR for the committee meeting next month.
                 MR. TROWBRIDGE: An award-winning CAFR, no
10
11
     doubt.
12
                 MR. KIRTLAND: Yes.
13
                 MR. TROWBRIDGE: Mr. Chair, can I go back to
14
     the lease for just a moment?
15
                 MR. HOPE: Yes, sir.
                 MR. TROWBRIDGE: Are we continuing to work
16
17
     in parallel with the firm that presented to us just to
18
     continue to identify potential --
19
                 MS. BOHORQUES: So, the first step was to
20
     amend the contract with United Way -- the lease with
21
     United Way, and then the next step is to secure a
22
     company that will do that or can do that, but we'll open
23
     it up as well.
24
                 MR. TROWBRIDGE:
                                  Okay. Thank you.
```

MR. HOPE: Okay. Any other discussion?

```
(NO VERBAL RESPONSE.)
 1
                  MR. HOPE: If not, meeting is adjourned.
 2
     Thank you, folks.
 3
                  (Whereupon, at 10:19 a.m., the meeting was
 4
     adjourned.)
 5
