

Finance & Operations Committee Meeting Transcript

June 7, 2018

1	THE CHILDREN'S TRUST FINANCE AND OPERATIONS
2	COMMITTEE MEETING
3	
4	The Children's Trust Finance and Operations Committee
5	Meeting was held on Thursday, June 7, 2018, commencing
6	at 9:33 a.m., at 3150 S.W. 3rd Avenue, 8th Floor,
7	Conference Room A, Miami, Florida 33129. The meeting
8	was called to order by Kenneth C. Hoffman, Chair.
9	Committee Members
10	Kenneth C. Hoffman, Miami Coalition of
11	Christians and Jews Steve Hope, At-Large Board Member
12	Laurie W. Nuell, At-Large Member Representative Nicholas Duran,
13	Miami-Dade Legislative Delegation Esther Jacobo, State Attorney Representative Miami-Dade
14	Leigh Kobrinski, Assistant County Attorney
15	STAFF:
16	James Haj, President/Chief Executive Officer
17	Imran Ali
18	Deborah Robinson
19	Emily Cardenas
20	Juana Leon
21	Juliette Fabien
22	Lisanne Gage
23	Lori Katherine Hanson
24	Muriel Jeanty, Clerk of the Board
25	Sheryl S. Borg

1
                            PROCEEDINGS
 2
                 (Recording of the meeting began at 9:33
    a.m.)
 3
                MR. HOFFMAN: Okay. Let's bring the meeting
 4
    to order. It's 9:33 a.m. No particular opening
 5
    remarks. Do we have any public comments?
 6
 7
                 (NO VERBAL RESPONSE.)
                 MR. HOFFMAN: No. What happened to Muriel?
 8
 9
                 MR. HAJ: She's not feeling well.
10
                 MR. HOFFMAN: Okay. So, our first order of
    business, then, is approval of the May 17th minutes,
11
12
    which is tab --
13
                 MS. LEON: It's right after the agenda.
14
                 MR. HOFFMAN: -- yes, past the agenda. Do I
15
    have a motion to that effect?
                 MS. JACOBO: I'll move it, Jacobo.
16
17
                 MR. HOPE: Second, Steve Hope.
18
                 MR. HOFFMAN: Does anybody have any comments
    on the minutes?
19
20
                 (NO VERBAL RESPONSE.)
                 MR. HOFFMAN: Okay. All those in favor?
21
22
                 (WHEREUPON, the Board members all responded
23
    with "aye".)
24
                 MR. HOFFMAN: Opposed?
25
                 (NO VERBAL RESPONSE.)
```

MR. HOFFMAN: Motion carries. So, we'll move right in, then, to -- Bill, you want to make a presentation on the auditor selection process?

2.

MR. KIRTLAND: Sure. I think Jim might have some comments as well.

MR. HOFFMAN: Okay, Jim.

MR. HAJ: Thank you, Mr. Chair. We're pleased to present to you today the results of the intensive review process for applying audit firms responding to the Trust's RFQ for financial audit services for the next five years.

The review committee was comprised of five reviewers, three external and two internal. Our internal was Bill and Wendy, and our external was Monti Larsen from the Children's Services Council in Broward, that's our sister organization, she's the chief operating officer, Carlos Molina, who's the CFO at the United Way, and Dr. Jacques Bentolila, who was just recently promoted in Miami-Dade County to the assistant director of internal services department.

The RFQ was released on April 16th and applicants had a month to respond. The review committee held a debriefing meeting on May 25th to discuss the results of each of the respective reviewers to come to an agreement and recommendation that Bill will be

presenting to you today.

MR. KIRTLAND: Thank you. Good morning, everybody. As you can see, we have a lot of different presentations on our agenda today, so we ran out of tabs on our I-Pads, so now you have just good old-fashioned paper floating around that includes the results of our review process of our applying audit organizations.

So, I'm just going to take a few moments maybe to describe what you're looking at and also clarify for you items that need to be considered.

So, of our five submitted applications, there was Keefe McCullough, Marcum, Caballero, Fierman Llerena & Garcia, Mauldin & Jenkins and WithumSmith+Brown.

So, of these five organizations, initially, we considered four of the five organizations to meet all of our technical review requirements, with WithumSmith+Brown not meeting some of the qualifications that we had laid out in the RFQ.

But also, after further discussion with our attorneys and review of the by-laws, we did continue to consider Caballero, Fierman Llerena & Garcia, just as the By-Laws Committee was meeting to discuss several of the items included within it.

And some of the language that's in our

by-laws currently is that we cannot consider an auditor for a return audit after using them in the previous five years. We included them in the scoring just in case the interpretation was to yield another understanding of what that meant.

2.

So Caballero, Fierman Llerena & Garcia applied using another lead engagement partner in their application rather than Andrew Fierman, who was our previous lead engagement partner. So they were considered but under further review of the by-laws, they actually should not be considered a part of this process based on the technical review requirements of the RFQ.

And in accordance with our policies today, we would be recommending and presenting to you the top three firms for recommendation. So, as you can see, Caballero, Fierman Llerena & Garcia are not considered. That leaves us, by default, with three firms that qualified, with Marcum leading with the scoring of 94 and Keefe McCullough with 88.8 and Mauldin & Jenkins with an 88.2.

We reviewed the applications. They were all very competitive in all relevant fields, such as their qualifications, experience, and the audit approach price. The prices of these proposals range from \$20,000.00 on the low end to about \$29,000.00 on the

high end of the first-year audit, and then they scaled the prices of those audit fees as they progressed in the five-year term.

2.

We currently have an audit fee of \$25,500.00, so these proposals were, again, very competitive with the current rate that we are paying our auditors.

The review committee found the value and looking at the audit approach, how accessible would the staff be if we had continuing, ongoing needs and services of the audit, being able to work closely with that staff. We often, in addition to the audit services, utilize our audit firms for consultation, upcoming government accounting pronouncements that maybe we need to know about and be prepared for.

So, essentially, today, with the review committee providing the results, we are, I believe -- and Leigh, you can correct me if I'm wrong -- we're seeking a motion by the committee to approve their recommendation that now, following the Finance Committee, which, in part, is acting as the audit committee, that we would notify the applicants of the results.

That would open up the process or the availability of those applicants to appeal the scores of

1 | their review results and the recommendation made here.

2 | But given -- continue to find that there's not any

3 | appeals made in the meantime from today's Finance

4 | Committee to July's Finance Committee, then we would

5 | just bring a resolution at the July Finance Committee to

begin negotiating the next contract with the

7 | recommendation made here today.

MR. HOFFMAN: Can you just clarify, or
Leigh, what would the appeal be? Because I thought they
could appeal -- in the normal course, could appeal
procedural issues, not necessarily a qualitative score
on a particular item. In other words, 19.2 versus 18.9,
I thought they can't appeal.

MR. KIRTLAND: Right, exactly. It most likely would have to be on the basis of the technical review. Perhaps, just as an example, maybe one of the firms that we eliminated from consideration before maybe substantive review, perhaps they think that maybe our interpretation of one of the requirements was not considered correctly.

But given the strict parameters that we put around the technical requirements before we considered reviewing the firm, I think an appeal is very unlikely, because just like our Program Services solicitations, there is a very -- there's a lot of work done on the

front end to make sure that we were getting exactly what we wanted out of the application process. So, I think, again, like you've stated, an appeal would be very unlikely between committee meetings.

2.

MR. HOFFMAN: And how many firms are not on this list?

MR. KIRTLAND: We had five organizations apply, so everybody that applied is on the list.

MR. HOFFMAN: And Withum was knocked off the list altogether because --

MR. KIRTLAND: Right. We looked -- I believe it was government-related experience. They did not have both individual and as a firm, the amount of government consecutive experience that we were looking for.

MR. HOFFMAN: Okay.

MR. HOPE: Question. So, in some of the categories that were reviewed, let's say, for example, understanding of work, where you have two of the firms scored 18.2 and another 19. What would be some of the variables that may account for that difference?

Let's assume someone was to contest the difference in scoring. What, as an example, that would account for an 18.2 versus a 19 that differentiates one provider from the other?

MR. KIRTLAND: Well, I think, essentially, in understanding of working -- depending upon the application and how well that they were speaking to their experience as a firm and how they would be able to work with us as a government organization.

2.

A lot of it seemingly ties together with the audit approach as well but the details that they included within their scope of work and understanding maybe everything they would need to do to complete our audit successfully, essentially outlining maybe the staff that they had assigned to that project, the qualifications that we do that separately discloses the profile and qualifications of the individual.

But understanding of work, you know, they essentially speak to their government experience, what they would -- how they would be able to attest to us maybe in a remote or an office environment and how well they spoke to how much detail they provided.

MR. HOFFMAN: Okay. See, that was my question. I don't think that somebody can challenge the 19 versus 18.9. But if we had knocked them out like, I guess, the Withum firm, because we didn't think -- they could say, but I showed it here in the presentation, you should have considered me.

So, Bill, then, is it the recommendation of

the committee that reviewed it to hire Marcum based on the scoring?

2.

MR. KIRTLAND: Based on our scoring, they met all the qualifications or had the most consistent results of the reviewers. You can see in the rankings, they might not have always been the highest ranked reviewer but they were at least the one or two -- first or second ranked firm that were very highly scored amongst all the reviewers, that kept their average, you know, staying around 94 percent. So, they are our lead application.

MR. HAJ: And during the debriefing meeting, too, there was consensus when they were discussing where Marcum is, they were number one.

MR. KIRTLAND: Marcum has had broad relative experience with firms, that the Broward CSC has utilized them in the past. We've utilized them in the past as well. And United Way, who was also one of our reviewers, Carlos Molina, had used Marcum.

So, everybody had used some historical -- had some historical basis for the type of service that they provide and were all very pleased with the results of their audits in the past.

MR. HOFFMAN: Okay. And staff is comfortable with the team that they put up as well; in

```
other words, the people that to --
 1
 2
                 MR. KIRTLAND: The team that will represent
    Marcum?
 3
                 MR. HOFFMAN: Yes.
 4
                 MR. KIRTLAND: Yes, absolutely.
 5
                 MR. HOFFMAN: Okay. I guess -- so, we need
 6
    a motion to -- Leigh?
 7
                 MS. KOBRINSKI: Motion to approve the
 8
    recommendation of the audit selection committee to
 9
10
     select Marcum.
11
                 MR. HOPE: Motion, Steve Hope.
12
                 MR. DURAN: Second, Duran.
13
                 MR. HOFFMAN: Okay. Any further discussion?
14
                 (NO VERBAL RESPONSE.)
15
                 MR. HOFFMAN: Okay. All those in favor?
16
                 (WHEREUPON, the Board members all responded
17
    with "aye".)
18
                 MR. HOFFMAN: Opposed?
19
                 (NO VERBAL RESPONSE.)
20
                 MR. HOFFMAN: Okay. Motion carries.
    Bill? No, Jim, sorry.
21
22
                 MR. HAJ: Mr. Chair, thank you. On the
23
    second tab, you have a budget highlight that I'd like to
24
    go over. So, I do thank this committee, for the last
25
    three or four committee meetings, looking at the fund
```

balance, giving us some guidance.

We had the millage conversation. So, we have a proposed budget highlight in front of you. And we're exceptionally excited about this budget because I think, as of the last Board meeting when we got the 28 million additional dollars onto the streets for children and families, is a great thing for the Trust.

So, the Children's Trust continues to emphasize the importance of program spending that provides critical services to children and families. We recently got the Miami-Dade Property Appraiser report on preliminary assessments tax roll at 29.1 billion.

Again, this is just preliminary. As of July 1, we will get the final numbers. If the Board adopts a .4410 millage rate, that's the approximate rollback rate that may change depending on July 1 but it should be right about there, the ad valorem tax revenue for the fiscal year '18-'19 would be approximately the same as the previous fiscal year at approximately 121.8 million.

The Children's Trust plans to add approximately 28 million in additional funds earmarked for program services through fiscal year '19-'23. The majority of the funds, the vast majority was approved at the last Board meeting.

And despite an approximate increase to

program services funding, we put a lot more money out there. There's a lot more work but we were able, also, to continue driving down our costs.

2.

The Children's Trust is budgeting a net decrease in management expense of approximately twenty seven thousand, which includes a four percent merit increase for next year for staff.

The Trust has now budgeted a decrease in management expenses for the last three years of \$470,317.00 and \$27,300.00 this year, for an approximate \$814,000.00 in savings the last three years for general administration.

The '18-'19 budget for management expenses is 6.33. And this is what we're very proud of. It's an all-time low. It's the lowest that we've had for 15 years and much lower than in the past.

So, we're happy to do much more for kids and families while being much more efficient on our end.

One of the technology resos you'll see later today, that we've been using technology to effectively drive down some of the management costs.

If you go to the next three pages, this is the attachment which you see every year. Attachment A, the first page, is what -- once this is approved, this page, as it is, will get published in The Herald in

notice of our TRIM hearings.

And this just breaks down a lot of discussions we've had in the last three months. And I can go into detail if anybody wants to go through each of these one by one, but I just want to take you through the three sheets.

The second sheet is again, the same discussion we've had the last couple of months. This is the fund balance sheet. This talks about fund balance.

And then the third sheet is the core strategy. If you really want to drill down, this is broken down by the different programs where the money is and the percent increase.

If you want to reflect on what we've talked about the last couple of months, there's a tab, a five-year tab that shows the chart of the fund balance. Mr. Chair, if you want to refer to that to have any discussion, it shows the last two months.

So, again, these three, what we call the Attachment A and the supporting documentation, these are the three that will come to the Board. And just to go through the timeline, once we discuss this today, this will move to the full Board for discussion, and then it comes back to the Finance Committee in July to approve. Then it goes to the full Board to approve to take to

TRIM for the September meetings. And next month, we will have the TRIM release for the Board members.

2.

MR. HOFFMAN: Okay. And as, I think, Jim said earlier, that presentation kind of ties into the fund strategy that we've been talking about, including at the last meeting. Bill, do you want to take us through the tab on that?

MR. KIRTLAND: Exactly. So, if you were at the last Finance Committee meeting and you see the five-year strategy tab, you'll notice a lot of the same exact talking points as what we discussed last time around.

We've done a little bit of updating to this presentation because in the meantime, we were notified by the Miami-Dade County Property Appraiser's Office of what the 2019 tax roll value would be based off -- originally, we projected maybe about five billion dollars less in the overall property value in Miami-Dade County, so their estimate was 291.1 billion dollars.

So, this raised our basis and our threshold a little bit of what we would be applying our millage rate towards to draw the revenue that we would need for next year's budget.

But the strategy overall stays the same. We were discussing at our last meeting that essentially in

year one of our five-year strategy, we would again institute a rollback rate because of the need to use the fund balance that we currently have built up, essentially utilizing all of the projects that we have within arm's reach within the next year.

2.

So we will continuously work for more opportunities to fund additional projects and what needs there will be to raise that rate during the five-year period. But essentially, our goal is to end -- at the end of the five-year cycle, to bring our millage rate and the revenues back to the amount that we need to continuously fund our programs, even into the next five years.

So, essentially, generating these budget schedules was relatively simpler this year based upon discussions that we already had at the last committee meeting. There was some direction already as to the amounts of programs that we wanted to fund.

At our last Board meeting, we already approved a majority of the funds that we would need to include in next year's budget. So, really, from this point on out, it's about managing our revenues, monitoring our fund balance.

We have a pretty good understanding of, you know, how much -- how much and how many programs that we

will be funding in the next five years while we continue 1 2. to look for more opportunities. So, the schedules reflect our strategy, 3 which was the scenario 1 strategy, but we've 4 5 discussed -- we got the impression from the committee that was maybe the better strategy of the two that we 6 7 presented to proceed with in the next five years. MR. HOFFMAN: Thank you. Any questions on 8 9 that? 10 (NO VERBAL RESPONSE.) 11 MR. HOFFMAN: Okay. We don't need to take 12 any particular action on this preliminary budget, do we? 13 MR. KIRTLAND: I might refer to the 14 I think, does there need to be a motion to attorneys. 15 approve? MR. HAJ: We're going to present it to the 16 17 Board as an FYI. So, if everybody's kind of approved 18 this to take to the Board to present --19 MR. HOFFMAN: So, we're going to have, in a 20 minute, a couple of resolutions on that IT matter. 21 I think, before that, Stephanie will give us a little 22 update on the RFP and what we'll be approving. 23 MS. SYLVESTRE: Our new IT director, Sheryl 24 Borg, is going to do the presentation. 25 MR. HAJ: Mr. Chair, if I can tee up Sheryl

before she starts. Before the two IT presentations, again, Sheryl has just been going to kind of the IT span and where we're going with IT. I know it's been a big week discussing this the last couple of years.

2.

We kind of want to show, even throughout the resos, some of the resos have a very detailed amount and amounts that we do not need to bring to the Board that are small.

But we wanted to put everything on here so the Finance Committee sees the global of where this ended. And Mr. Chair, I know you asked for the chart. We added the pie chart for the resos and the different amounts so everybody can see the global view, and that we've come to a point where you're approving IT resos and this is pretty much it. You're not going to see it every month in the IT resos, so that you can see the whole chart and get the global of our IT. Sheryl?

MS. BORG: Good morning, Mr. Chair, members of the Finance & Operations Committee, Trust leadership, guests. Thank you for the opportunity to share and update the IT Way Forward.

We've made a lot of progress. I'm going to discuss some of the new developments that are coming and looking forward to sharing with you. I'm just going to stand up for a little bit so I can see all of you

sitting back here and that gives me an opportunity to see that.

2.

Since I began as the IT director about four months ago -- it's been only four months -- due to the leadership of our Board and the executive staff here at the Trust, the IT vision was aligned already with current best practice trends.

And some of those things were evidenced right away by service solutions. Many of those things have already been realized. So, one of the challenges for staff was that there was not a tremendous amount of standardization, how would they access the tools that they needed to do their work.

So, some of those were done right away with six web links now. That way, they can use six different ways with which they can engage with their information, their office suite, their web connections to the application to Trust Central and so forth. So, already, the processes were in place for you to start bringing about service improvement.

All the devices and the network, the infrastructure, those things that we use every single day in order to access systems, are now being managed as a service.

This is causing a tremendous improvement of

both process and in cost effectiveness. We've simplified, standardized and we now are supporting our technical foundation. They're all in place. And now we move on with just more value-add services.

2.

We've also set up an environment for information marriage -- information and technology are partners. They work together. Once the infrastructure and technology is solidly in place, you can start moving onto more focus on information management.

One of the things that the Trust has in its vision is that we're partners in this community. So, sharing a common goal and working together is critical for all of our success.

Identifying whether one of our partners is having a challenge is one of those areas where we can now add value. We use a recent example that was in the process as I was coming on-board.

There was an issue with getting to some of the information that our providers needed in order to provide their solicitations. So there was an identified need to the grants module to support the solicitation process.

In order to do that, we were moving forward with leveraging both technology and business process re-engineering. That's where the rubber hits the road

now for information.

When you're looking at ways with which you can automate systems, you're not looking at ways to also further your business processes and actually make improvements, that's where technology and information meet and leverage.

In this process, innovative solution, functionality, eliminating manual processes, storing application and review data, and even providing functionality to collect requests for appeals if they were needed. All of these were now centrally located in a single place.

This also added value not only to the providers, because they have a place to go, we've lost the need to provide a lot of manual forms, but we also, as a team, as a staff, are able to do reviews on information in a single place. As those opportunities started to crystalize, they were able to make these reviews and processes much easier.

We've also heard recently, from the public comments from both the Board and committee meetings, that providers' experiences have been greatly improved in this process. We have been able to improve their ability to have transparency. It's easier. It's comprehensive. It's clearer.

I was ecstatic to hear feedback over the last month or so, in our Board meetings and in the meetings with providers, that they were able to say, you know, that their experience has been greatly improved.

2.

For Trust leaders, this cross-portfolio process allows us to utilize 24 data points. These funding recommendations, as you know, were approved by the Board last month and the investment has resulted in recommendations and now approval for 223 contracts we're funding for 84.3 million dollars.

So, as we look back at how IT is now being brought to you, the rest of these processes, we are able to leverage things like continuous data decision -- data-driven decisions.

The 24 data points, we talked a little bit earlier about the assessments that we're using in order to make decisions. Clearly, we are weighting and using information points and we're hearing more and more across our own ecosystem how important that is in order to support decisions.

So, these now allow us to have more opportunities to have touchpoints with our providers. We can meet with them. We are able to crystalize our decision-making processes.

As we move into where we are now, these

processes are allowing us to move forward. The Children's Trust ecosystem is able -- and all of us are included in that ecosystem -- getting the information of organizational assets.

2.

And I'm talking about those systems that provide information both from the Trust Central perspective, information that's coming from our list, information that's coming through and across our community, indicators where people are able to collect that information and actually start to assess how we can make a greater impact for children and families in our community.

Data information needs to be pervasive and utilized in every decision-making point. We are able to now take those data points and make actionable and usable approaches for both stakeholders at the Board level, staff, providers and community members.

Presented in a variety of forms, information needs to be easy, secure, accessible and actionable.

When I tell you that there's a data point, you know, one of our team members came to me one day and said, here's a report that says, 732 and, you know, those are data points. In the context, how do we help move those data points forward to make them actionable?

Presenting information in prepared forms,

1 | right, radical, visual, dashboards, score cards.

2.

Aligned with our mission of value in our goals, we would like data to continually assess, measure, improve, conduct research and share the stories with our Trust programs. Leading to information management and actually moving to a place where information is easy to get to and easily understood allows us a lot of ability to be inquisitive, asking questions that we need to ask.

Hitting the same report over and over may be helpful for those of us that need to benchmark the data over time. But being able to be inquisitive and access information and democratize or access to people forums allows people to be able to get to those data points that they can now inquire further and really advance the ball.

There is still much work to do. Telling the story of our children and how they're impacted in our community is one that is an ongoing effort for all of us as a community.

Performance measurements. How are we doing? Which programs are in need of assistance? Getting the information into the hands of those people that can action and assist programs as they're working through their cycles is critically important.

What are the outcomes of our efforts and how

2.

can we start to associate those outcomes to other things that are happening in our community, reaching across our community and engaging in data-sharing opportunities across school systems, across the county, across other parts of our ecosystem allow us to enrich and speak to those opportunities that are actually generating change. The true measure of communities is how we advance the ball for children.

We still have much work to do. I'm going to share with you what our current landscape is and what our approach is going to be moving forward. The current information landscape here is one where we have information in multiple places.

In this sense, you can see the user is a person trying to get access to the information and they have it in multiple places. It is an approach that needs to change in order for us to really truly leverage information management. It's a bit laborious. You see the poor user there trying to get information from multiple places.

We've already built out and are starting to bring together the innovative data repository. The innovative data repository is the place where we contain and keep our information for the Trust. It provides a backup to our data bases and it allows us to be able to

access the information that's critical for us.

As you can right now, two sets of our data are there and are able to be accessed. But the move forward strategy is actually going to be to keep that information and we're doing that on an (indiscernible) basis. Starting to bring together those data into a single place allows us to actually process that data and enrich it for reporting.

If you want to just move to the next slide. Future for information landscape includes bringing those data together so that way, we don't have redundancy, so that way, we have a secure environment. That way, we have a place where we can gather the information and do those processes that require us to go to user-based rules.

Well, how do we use this information? Raw data, information in its raw form, is helpful. But processed information creates knowledge. How do we know if it will be effective? How do we measure the utilization? How do we look at unit cost and head count? How do we measure impact?

Those are users' rules that have now been created in a set of processes. The user can now access one set of data that are enriched and prepared for -- designed for optimized reporting.

So, that's kind of the future state. There will be -- in the next six to eight months, there will be some significant efforts. I can tell you that we've already started to build out a small pilot set of data and moving into the IDR environment.

2.

In the month of June, by the end of the month of June, we'll be having a pilot set of data that we'll be able to pass and moving forward with information directly from our IDR, so it's a very exciting time.

MR. HAJ: And the IDR is?

MS. BORG: Integrated data repository, excellent. The integrated data repository, as I said, not only improves our data, but we can also start bringing together those community indicators, those data-sharing opportunities that exist across our ecosystem. So, that makes for a solid foundation as well as opportunities for data-sharing.

Information can be descriptive. It can be predictive. It can be predictive. How should we do it? In what way can we get the information out? The information can be provided in a verse and so forth. So, it can be an actionable place for us to be from the standpoint of being able to look forward and find out how to support our systems.

I wanted to share with you something else 1 2. that we currently have in development. I'm actually comparing charts for a moment. As you know, 84.3 3 million dollars in youth development and parenting 4 5 awards were just --(Off the record.) 6 7 MS. BORG: So I'm going to share with you a visual, something that's currently in development that 8 9 we're getting ready to set up on our website. Also, I'm 10 going to bring it up on my phone. So, we will have this 11 available and mobile-friendly. 12 MS. SYLVESTRE: One second. If you're on the IT finance tab and you click, "Preview Interactive 13 14 Map, " it will pop up on your I-Pad. 15 MS. BORG: So let's just go ahead and close 16 this. Thank you. 17 MR. HAJ: And if it pops up on your I-Pad, 18 if you just touch any of the dots, the information will --19 20 I'm going to show you right now. MS. BORG: 21 MS. SYLVESTRE: You can zoom in -- one is 22 parenting and one is youth development. 23 MS. BORG: So, this is a recent development.

We're going to be sharing this out onto our website

shortly. So, we have a list out here to the side.

24

25

you can see, we've got our sites notated and selected, so we can select and de-select any of these different variables here.

25

And we can focus on our areas of need. I'm going to un-click. As you see, it changes as you move forward. Now I've identified those areas of need right here, our larger population, as previously defined.

So, we are now able to see within those areas of need, those areas that have been funded. If you hover over and select those, there are actually actionable and you can see the agency, the name of the agency, the site, the number of slots, the type of initiative and so forth.

So, we can take a look at those. There happen to be more than one at this site so we can scroll through them.

MR. HOPE: Question.

MS. BORG: Yes, sir.

MR. HOPE: You talked about in the future, I guess, the providers being able to work in a collaborative --

MS. BORG: Yes.

MR. HOPE: -- with the technology.

MS. BORG: Yes.

MR. HOPE: Would providers be able to

1 leverage some of the technology for their own reporting
2 purposes?

MS. BORG: Absolutely.

work?

MR. HOPE: Okay. And how is that going to

MS. BORG: Excellent. So, one of the ways with which we're able to add value to the process now is that we're going to be doing some more outreach directly with providers and sharing time and staff with our providers, talking with them about this technology and how to leverage their technology in order to support the programs.

These services are going to be available to them in order to access their own information. So, this mapping and so forth will be available throughout our ecosystem.

MR. HOPE: And accessible so a provider can get data to map the location of their clients, for example?

MS. BORG: Exactly. So, for example, this is actually utilizing information that's in our Trust Central system, okay? So, this is data that we actually have used through our solicitation process and is now in our awarded process. And those data can be reflected using different types of interfaces with which we show

1 | the data.

It can be done through the reporting systems, through our Trust Central reporting systems, as well as geographical representations. So, there will be multiple ways to deliver the information based on what the needs are for the providers.

One of the beauties of building out an integrated data repository is that the data is solid and foundational, and we can use many different types of tools, if needed, to present the data.

So, you know, when I talk about the ecosystem, really I'm talking about all of us within this process, primarily focused, of course, on serving the needs of our providers.

And all of the focus, as we've built these things out, even when we built the solicitation process, we were able to do so that served both the needs of the provider and also facilitated the ability for staff to make those decisions in a timely fashion and equitable fashion.

MR. HAJ: And Steve, for your information, besides the provider community, throughout the County, people request things from us all the time, for our mapping, for our data, and we're here to assist wherever needed.

MR. HOPE: Okay.

2.

MS. JACOBO: And is this -- is this now available -- this is already available?

MS. BORG: So, actually, this is in the last stage of development and it will be posted up on our website in the next --

MS. JACOBO: Very, very soon?

MS. BORG: Absolutely. We're hoping next week. You're actually getting a little bit of a preview but we're very excited about bringing this. We wanted to also show you that we have the ability to look a more detailed or granular level, so that a user could actually extract the data if they wanted to into an Excel spreadsheet or something that was actionable for them. And we're looking at building out some other functionality here that might connect directly to additional information websites and so forth for the individual providers.

This is completely searchable, as you can see, much like any other map that we're all familiar with using. This is the beauty of bringing technology into a more simple form, too, is that we start to look at ways with which we already are comfortable accessing the information; our phones, our tablets and so forth. This is all mobile-friendly and accessible. So, users

are able to just go out there and get to the information that they need.

2.

There's still quite a bit of work to do.

I'm sure there's something that's clearly in development
but certainly in the direction, the trend with which
we're going to continue to grow.

This is a collaborative process, though.

And as we reach back to providers and get information through our ecosystem, that's where some of the good ideas come from.

And as we roll things out, we realize that we have more and more questions and things we'd like to answer. So, since we rolled it out, there's more and more exciting things to build.

So, just to kind of wet your whistle, give you the first preview here, I appreciate your time. I appreciate your attention and I welcome your comments. I welcome your questions. I welcome your feedback.

We did talk about this being a collaborative process. We appreciate your ongoing support and your leadership and partnering with us to improve the lives of children in Miami, for families and children.

MR. HOPE: If I may, one last question. So, the budget shows \$800,000.00 for information technology.

MR. HAJ: Yes, the last slide.

1 MR. HOPE: The pie chart has nine fifty. 2 MR. HAJ: Yes. If you see, there's a hundred and fifty, and you'll see it on the reso, too, a 3 hundred and fifty comes from the research budget for the 4 5 IDR. MR. HOPE: Okay. So, the additional one 6 7 fifty would come from the million dollars? MR. HAJ: From research. 8 9 MR. HOPE: Research? 10 MR. HAJ: Research budget. The \$800,000.00 11 is IT. Right now, you're a hundred and fifty over and 12 that hundred and fifty is coming from the research 13 budget for the IDR. 14 MS. SYLVESTRE: No, not for the IDR. It's 15 for -- it's for data work that we're doing at the University of Miami to collect community data and be 16 17 able to do reporting on it. 18 MR. HOPE: Okay. So, if I look at the 19 2018-2019 budget, which line item does that one fifty --20 MS. SYLVESTRE: It comes out of the 21 research. 22 MR. HOPE: Program evaluations, too? 23 MS. SYLVESTRE: MR. HAJ: And if you see on the pie chart, 24 25 too, we put the reso numbers, so the next two resos,

you'll see 2018-A and 2018-B.

MR. HOFFMAN: All right. Thank you, Sheryl.

MS. NUELL: I have a quick question.

4 | Whatever -- what's it called, the I -- the depository.

When is that going to be -- when do you expect that to,

I guess, you know, be on-line where they're all

together?

MS. BORG: So it's already there. So, what we've done now is, we've begun the process of locating the data, which I talked about a little bit earlier, and we're actually starting to pilot the first data set that's going through its initial set of business application information.

We're piloting with a small set of information that's based on four current reports that we have in our ecosystem and that we want to move into the this, so it's a perfect time to start. So, as we start to do that, we'll gain some traction and so forth. But I expect in the next six to eight months, we'll see a tremendous growth in that ecosystem.

It takes a bit of time, because as we're doing that, we're also doing business process evaluation. We're looking at ways with which we do measurements, standardizing, meeting the functionality that will allow us to report across the entire

1 | ecosystem.

We also want to build a structure that allows us to bring in new data sources as we move on, so we want to build something that's foundational. We started with a small data set, I'll tell you that. It has some financial components. So, we'll start making some decisions right there and move that forward.

MS. NUELL: Thank you.

MR. HOFFMAN: So, just to follow up on these questions, one of the things that I've asked staff to do, and we talked about this last year, is just show us where we are in the building of the budget, which is what the pie chart is, and I think that's very helpful for me, at least.

I'd like to, as we go forward, I know we have other administrative ones, is again to have a similar type of picture of where we are in the process. And this look like then we're filling the budget for the most part with the IT spend for the next year.

MR. HAJ: And it has been, Ken. I know we've been talking about getting it, you know, instead of piecemeal, getting a reso for every month for 12 months, that we bring it all together.

MR. HOFFMAN: Or closer together. Okay. So, we have two resolutions that fit within this bucket.

The first is Resolution 2018-A, authorization to 1 2. retroactively ratify the agreement with SHI International Corporation and The Children's Trust, and 3 to renew licenses with multiple IT vendors for software 4 5 and hardware maintenance and support, in a total amount not to exceed \$108,347.00, for a term of 12 months 6 7 commencing October 1, 2018 and ending September 30, 2019. 8 Can I have a motion to that effect? 9 10 MS. JACOBO: I'll move it, Jacobo. 11 MR. HOPE: Second, Steve Hope. 12 MR. HOFFMAN: Any recusals? 13 (NO VERBAL RESPONSE.) 14 MR. HOFFMAN: Can we just have an 15 explanation of the retroactively ratified portion of 16 that? MS. SYLVESTRE: So, in 2016, we entered into 17 18 a three-year agreement with Microsoft. When you're 19 doing licensing -- software licensing, if you do 20 multi-year software licenses, you get a much better rate 21 than if you do yearly licenses. 22 And I think the way we submitted the resolution at that time made it seem like it was a 23 24 yearly license, so we're just kind of clarifying and 25 cleaning up. This is part of our cleaning up of our IT

house. I think this might be the last set of cleanup 1 because I think the rest of the contracts that we have, 2. we worked really closely with our current lawyers to 3 enter into, so they're aligned with our current policy. 4 MR. HOFFMAN: Okay. So, these are licenses 5 within a year under the same contract? 6 7 MS. SYLVESTRE: Yes, Microsoft, so, without our Microsoft licenses, we basically can't work. It's 8 one of our pillars. Microsoft and Trust Central are the 9 10 two core sets of software that we need to be able to 11 work. 12 MR. HOFFMAN: Okay. Any other questions or 13 comments on this one? 14 (NO VERBAL RESPONSE.) 15 MR. HOFFMAN: All those in favor? (WHEREUPON, the Board members all responded 16 17 with "aye".) 18 MR. HOFFMAN: Opposed? 19 (NO VERBAL RESPONSE.) MR. HOFFMAN: Motion carries. The second 20 resolution, Resolution 2018-B, authorization to renew 21 22 software services with multiple IT vendors in a total 23 amount not to exceed \$789,094.00, for a term of 12 24 months, commencing October 1, 2018 and ending September 25 30, 2019.

```
Can I have a motion to that effect?
 1
 2.
                 MS. JACOBO: Move it, Jacobo.
                 MR. DURAN: Second, Duran.
 3
                 MR. HOFFMAN: Any recusals?
 4
 5
                 (NO VERBAL RESPONSE.)
                 MR. HOFFMAN: Okay. Comments or questions?
 6
 7
                 MR. HAJ: If I may, Steve, if you see on the
     chart, the second to the last, the hundred and fifty
 8
     identified there with an asterisk for the IDS
 9
10
     identifying spending from the research budget.
11
                 MR. HOPE: Which one? University of Miami?
12
                 MR. HAJ: The IDS is second to the last on
13
     the chart. It's the integrated data system from
14
     University of Miami, so we did indicate that item.
15
                 MR. HOPE: Yes, thanks.
                 MR. HOFFMAN: Okay. Any other questions or
16
17
     comments?
18
                 (NO VERBAL RESPONSE.)
                 MR. HOFFMAN: All those in favor?
19
20
                 (WHEREUPON, the Board members all responded
21
     with "aye".)
22
                 MR. HOFFMAN: Opposed?
23
                 (NO VERBAL RESPONSE.)
24
                               Okay. Motion carries, and
                 MR. HOFFMAN:
25
     give it over to Jim for the CEO report.
```

1 MR. HAJ: Mr. Chair, thank you. Champions 2 for Children -- Madam Chair, I'm sorry?

MS. NUELL: I can do this before or after.

I wanted to go back to something on the budget, so I can ask now or after you finish. Okay. I just was wondering, to go back on that third page, the core strategies, especially with what we're talking about here, why the reduction in program evaluation and community research when I know that we're ramping that up?

MR. HAJ: Well, there's many reasons. But the major reason is really addressing the fund balance, is actually doing the actual budget, what we propose to spend. Because historically, we budget an assessed amount and do not spend it, it drops to the fund balance.

So, it's really trying to be lean and trying to budget our projections, as well as some of the other stuff that we do, like the early childhood research that we embedded into the solicitations so it's on this line.

But it really was working with our finance chair and our departments to really say, what are we doing. If there's an issue that we need additional money, we would come back and request it from the Board and make the amendment at that time.

1 MS. NUELL: But it isn't a reduction --

MR. HAJ: It's not.

2.

MS. NUELL: -- in research and evaluation --

MR. HAJ: No. It's reflecting actual --

MS. NUELL: Okay, because it kind of looked

like that. Okay, thank you. That's all.

MR. HOFFMAN: Back to you, Jim.

MR. HAJ: Champions for Children, Emily is starting the daunting task of doing the seating assignments. So, we are close if not sold out. We are close to 1,000 people and that's capacity, so we're going to have a nice event. I thank all the Board members. We have 20 Board members who RSVP'd. If you have them here, please let us know.

Family Expo is on September 8th. Summer youth internship is going exceptionally well. We're going to send something out to the Board about #Read30. This is something that was approved a couple of Board meetings ago that we're going to do a big social media campaign to combat the summer slide and encourage parents to read with their kids 30 minutes a day. So, we'd like also the Board members to read with their kids, put pictures, post it to social media and help move that out.

MS. JACOBO: Grandkids, too?

MR. HAJ: Yeah, grandkids, and send it to your network of people --

MS. NUELL: I would feel weird reading to my children.

MR. HAJ: Literacy never stops. Provider orientation training, this was on Tuesday. So, the Board approved all the providers last month. Tuesday, we had the orientation at UM for everybody, all the new providers, all the existing providers, with close to 300 providers in attendance.

Phenomenal training. Not only was all the executives presented, all the requirements, they had breakout sessions, they met their contract manager. But besides the information that was given, just the vibe of the room and the collaboration and the energy, it was very positive, I mean, exceptional.

I mean, I wish many of the Board members could have been there to see it. But the feedback we got was sensational. So, you know, I'm very pleased. With the last Board meeting and going with the providers, I think we're really set for the next five years to start working together to help children and families.

Monthly financials are on your tab. And if you have any questions, I'll be happy to or Bill will be

```
happy to go over it. Mr. Chair, thank you.
 1
 2
                 MR. HOFFMAN: Any other business or
     questions?
 3
 4
                 MS. NUELL: No.
                 MR. HOFFMAN: Motion to adjourn accepted and
 5
     approved.
 6
 7
                 (Whereupon, at 10:24 a.m., the meeting was
     adjourned.)
